Labor Market Information Section

Colorado Trends

A continuation of the State's economic upswing was clearly evident in the labor force data for November. The number of Coloradans at work posted another good gain while unemployment trended lower dropping the seasonally adjusted jobless rate two-tenths of a percentage point to 5.0 percent. The current rate compares favorably to the 6.4 percent of one year ago and is the lowest recorded in over four years. Total employment moved higher in November, the third rise in as many months. The number of workers statewide advanced 18,400 over the month to reach 1,623,200. One year ago, employment was 1,600,200. Corresponding to the lower unemployment rate, the number of jobless persons fell 2,600 to an estimated 84,700 in November. Joblessness was higher last year at the same time as 109,500 residents were out of work.

A strong national economy, increased hiring in many industries, very slow population growth and fewer major layoffs have all contributed to the current relatively low rate of unemployment in the State. The incidence of employee cutbacks has been declining all year and was particularly noticeable in November. Claimant's filing for initial unemployment benefits, those persons just losing their job, totaled 2,546 during the survey week, down 30 percent from last November and only half of the level in the period two years ago.

The start of winter usually brings higher unemployment to most of Colorado's labor market areas prior to adjustment for monthly seasonal factors. Many areas did better than normal in November as only 32 of the State's 63 counties registered an increase in their unadjusted jobless rate. A major exception was in Pitkin County and the ski areas in southwestern Colorado where poor early snow conditions slowed hiring temporarily adding to unemployment.

Stability characterized the national labor force picture in November. The Bureau of Labor Statistics reported the jobless rate remained at 5.3 percent for the fifth month in a row. Between October and November, employment rose 250,000 while unemployment fell 90,000.

Unadjusted nonagricultural wage and salary employment in Colorado gained 6,200 in November to 1,461,900. The increase was significantly higher than normal for the October-November period, continuing the recent trend toward a strengthening labor market statewide. Last year at this time total wage and salary jobs in Colorado numbered 1,437,100.

All but two of the State's eight major nonfarm industry sectors either advanced or remained unchanged during the month of November. The biggest gain came in services, adding 3,700 jobs over the month to 360,400. Amusements and recreation accounted for 2,500 of these new jobs as most of the major ski areas in the State got underway as scheduled. Business services was unchanged last month, but is up 2,000 jobs in the past year. That is the largest annual increase of any services' subsector except for health services (up 3,400). Business services' future continues to look bright. In January E. K. Williams & Co. will move its California corporate headquarters to Denver. E. K. Williams is the world's largest small-business consulting outfit serving 35,000 small businesses worldwide through a network of about 500 offices in 19 countries. The company provides financial management service to franchisees of national and international franchisors. The firm will initially employ 35 with plans to expand to 200 over the next five years.

Other gainers in November include trade (up 2,700), government (up 900), finance, insurance and real estate (up 500) and transportation and public utilities (up 100). Manufacturing remained the same as in October at 193,100. This sector is being held back by a stronger dollar the last several months. Softness in computers and electronics has surfaced with layoffs occurring at MiniScribe Corp. in Longmont and Ampex Corp. in Colorado Springs.

Job losses occurred both in mining (down 100) and contract construction (down 1,600) during the month. The decline in construction, however, was less than normal for the month. Strength is becoming more apparent in the industrial and non-building components of this sector. Besides the airport and activity on the newly passed Denver Bond issues several new projects have been announced. Examples are: an expansion of Excel Corp.'s beef processing plant in Ft. Morgan ($36.5 million); construction of a methanol plant in Commerce City by Intermountain Chemical Inc. ($26.6 million); a new headquarters and production facility for Boulder's Celestial Seasonings ($8 million) and the building of a new research facility at the University of Colorado's Health Sciences Center in Denver ($20 million).

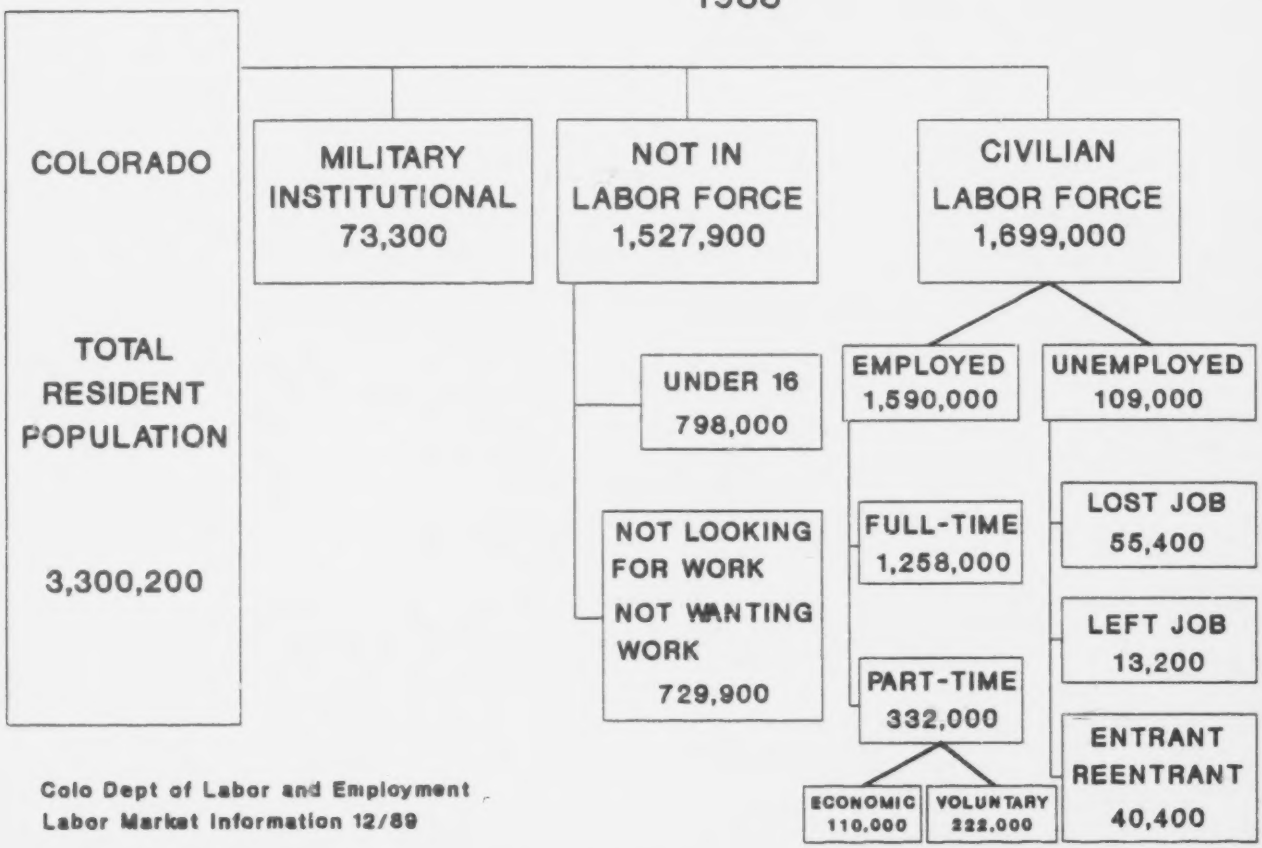
An increase in total employment coupled with fewer jobless residents dropped the seasonally adjusted unemployment rate three-tenths of a percentage point in the DENVER MSA to 4.5 percent. One year ago the rate stood at 5.9 percent. The November rate matches the lowest achieved since the current definition of the Denver MSA was adopted in 1983.

After seasonal adjustment, the estimated number of persons seeking, but unable to find, work fell for the third consecutive month. At 39,200, the number of jobless persons declined 2,400 from the prior month and is almost 13,000 less than the year-ago level.

Total employment continued on the upswing, gaining 7,600 to 839,300. Last November the number of working residents was estimated at 828,500.

Nonagricultural wage and salary jobs rose 1,100 during the month to 815,300, a greater than expected gain for the October-November period. Almost 11,000 jobs have been added to this series over the past twelve months. Hiring was greatest in the trade (up 900) and services (up 500) sectors, although job gains in trade were weaker than expected for the month.

LABOR FORCE PROFILE OF COLORADO'S POPULATION
1988



The above diagram profiles Colorado's total population in terms of labor force concepts. Persons are categorized based upon their responses to the Current Population Survey questionnaire in accordance with the official definition of employment and unemployment. The definitions relating to each group have changed little since the national household survey began fifty years ago.

Just over half (51.5%) of Colorado's resident population was included in the civilian labor force in 1988. Excluded groups are those in the Armed Forces, inmates of institutions, people under 16 years of age and those persons not presently looking for or not presently wanting work.

Additional detail is presented on the two labor force components. Employment is broken out into those usually working full-time (35 or more hours per week at all jobs) or those on part-time schedules. Part-time workers are classified into those who work fewer hours by choice and those forced by economic factors into working less than 35 hours a week. Unemployed persons are categorized according to what the individuals were doing at the time they became unemployed. For example, a person laid off because the employer's product was not selling would be a job loser and a person just turning 16 looking for a job would be classified as an entrant into the labor force.

Civilian labor force numbers are from the 1988 Current Population Survey. All other estimates were derived from data provided by the Division of Local Government, State Demographer's Office. A complete explanation of labor force concepts and definitions is presented monthly in the Bureau of Labor Statistics publication Employment and Earnings.

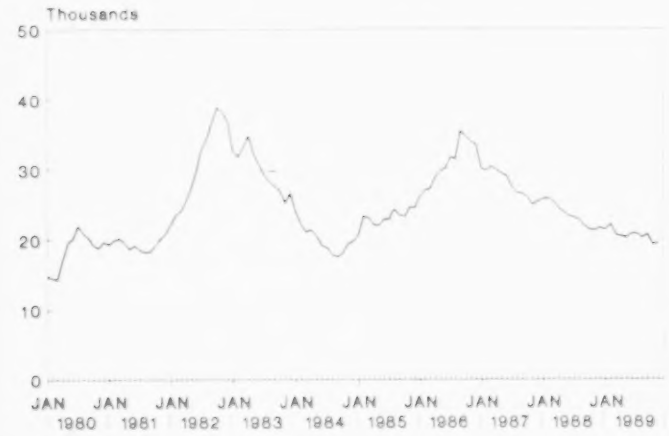
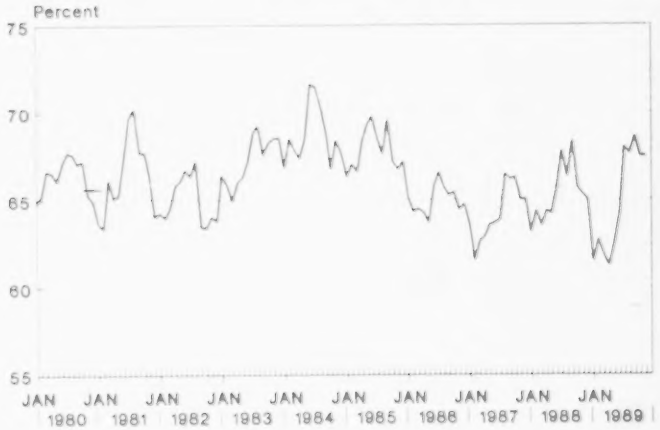
COLORADO CONTINUED UI CLAIMS (S.A.)



Data seasonally adjusted and represent persons with no earnings filing during week including the 12th of each month

CPS EMPLOYMENT-POPULATION RATIO



Ratios are directly derived from the monthly Colorado CPS and contain substantial sampling variability

FOOTNOTES TO DATA TABLES

Estimates made in cooperation with the U.S. Department of Labor, Bureau of Labor Statistics. Labor force components are adjusted to Current Population Survey Data. Estimates not seasonally adjusted except where otherwise noted.

1/ Data is seasonally adjusted. Recurrent yearly movements in labor force data associated with the Current Population Survey have been isolated and removed by the X-11-ARIMA Seasonal Adjustment Method. Industry data series detail may not add to totals because they have been independently adjusted. Effects of irregularities such as unseasonal weather, strikes, etc. on the trend-cycle component of individual series have been reduced by graduated treatment of extremes.
2/ Preliminary.
3/ Revised.
4/ Residents unemployed during the week including the 12th of the month.
5/ Includes residence adjusted nonagricultural wage and salary workers, self-employed, unpaid family, domestic workers and labor disputants.
6/ Estimates of all full and part-time employees who worked during or received pay for any part of the pay period including the 12th of the month. Excluded are self-employed, unpaid family, domestic workers and members of the Armed Forces. Estimates based on March 1986 benchmark utilizing 1972 Standard Industrial Classification Codes. Only subsectors for which an adequate estimating sample is available are shown. Due to rounding, sum of major industry sectors may not equal total.
7/ Averages, prepared by the Colorado Department of Labor and Employment, based upon data for full and part-time production, working supervisory, and related employees who worked during the pay period including the 12th of the month. Average earnings are computed on a "gross" basis and may reflect change in basic hourly and incentive wage rates. Average hourly earnings are not wage rates but averages of gross earnings of all employees below administrative level.
8/ The Colorado statewide totals for number of weeks compensated and amount of benefits paid include counts relating to lost checks and previous benefit underpayments under the regular State Unemployment Insurance Program.

GLOSSARY OF TERMS

CURRENT POPULATION SURVEY (CPS) - Is the official survey instrument for measuring labor force attachment in the United States. A survey of about 60,000 households is conducted throughout the nation each month by trained interviewers. Employment and unemployment data for Colorado reflect responses of approximately 900 households within the State which are represented in the CPS sample.

EMPLOYED PERSONS - Are those individuals 16 or older who worked at least one hour for pay or profit or worked at least 15 unpaid hours in a family business during the survey week. Individuals are also counted as employed if they had a job but did not work because they were ill, on vacation, in a labor dispute or prevented from working because of bad weather or personal reasons. Each person is counted only once by place of their residence. Persons in the Armed Forces are excluded.

UNEMPLOYED PERSONS - Are those individuals 16 or over who did no work during the survey week, were available to work and had taken specific actions to find a job during the last four weeks. Persons who have been laid off subject to call-back or are waiting to begin a new job within 30 days are also classified as unemployed.

UNEMPLOYMENT RATE - Is the total number of unemployed persons expressed as a percentage of the employed and unemployed, i.e., as a percentage of the civilian labor force.

REVISIONS

Labor force statistics for the period 1988-89 have been revised to reflect the 1989 Current Population Survey results. Industry employment data has been benchmarked to March 1989 employer reports. Industry data for 1988 and 1989 are based upon 1987 Standard Industrial Classification Codes. The monthly labor force series for Colorado only has been revised back to 1987.

* Metropolitan Statistical Area includes Adams, Arapahoe, Denver, Douglas and Jefferson Counties.

** Metropolitan Statistical Area includes Boulder County.

Estimates made in cooperation with the U.S. Department of Labor, Bureau of Labor Statistics and adjusted to the 1989 Current Population Survey (CPS). Estimates are not seasonally adjusted.

Total resident employment includes nonagricultural wage and salary workers, self-employed, unpaid family and domestic workers, agricultural workers and persons involved in labor disputes. Beginning in 1986 agricultural estimates are based on monthly CPS and benchmarked to the Agricultural Labor Survey (ALS).

* Metropolitan Statistical Area includes Adams, Arapahoe, Denver, Douglas and Jefferson Counties.

Estimates made in cooperation with the U.S. Department of Labor, Bureau of Labor Statistics and adjusted to the 1989 Current Population Survey (CPS). Estimates are not seasaonally adjusted.

Total resident employment includes nonagriculatural wage and salary workers, self-employed, unpaid family and domestic workers, agricultural workers and persons involved in labor disputes. Beginning in 1986 agricultural estimates are based on monthly CPS and benchmarked to the Agricultural Labor Survey (ALS).

* Estimates of all full and part-time employees who worked during or received pay for any part of the pay period including the 12th of the month. Excluded are self-employed, unpaid family, domestic workers and members of the Armed Forces. Estimates based on March 1989 benchmark utilizing 1987 Standard Industrial Classification Codes. Data is not seasonally adjusted. Only subsectors for which an adequate estimating sample is available are shown. Due to rounding, sum of major industry sectors may not equal total. Goods producing industries are mining, construction and manufacturing. Estimates made in cooperation with the U.S. Department of Labor, Bureau of Labor Statistics.

* Estimates of all full and part-time employees who worked during or received pay for any part of the pay period including the 12th of the month. Excluded are self-employed, unpaid family, domestic workers and members of the Armed Forces. Estimates based on March 1989 benchmark utilizing 1987 Standard Industrial Classification Codes. Data is not seasonally adjusted. Only subsectors for which an adequate estimating sample is available are shown. Due to rounding, sum of major industry sectors may not equal total. Goods producing industries are mining, construction and manufacturing. Estimates made in cooperation with the U.S. Department of Labor, Bureau of Labor Statistics.

Department of Labor and Employment, Labor Market Information - March 1990

* Estimates of all full and part-time employees who worked during or received pay for any part of the pay period including the 12th of the month. Excluded are self-employed, unpaid family, domestic workers and members of the Armed Forces. Estimates based on December 1986 benchmark utilizing 1972 Standard Industrial Classification Codes. Data is not seasonally adjusted. Only subsectors for which an adequate estimating sample is available are shown. Due to rounding, sum of major industry sectors may not equal total. Estimates made in cooperation with the U.S. Department of Labor, Bureau of Labor Statistics.

* Due to rounding, sum of individual items may not equal totals. Estimates include all full-time or part-time wage and salary employees who worked or received pay during the week including the 12th of the month. Nonagricultural self-employed, unpaid family workers, and domestics are excluded. Estimates based on March 1985 benchmark utilizing 1972 Standard Industrial Classification Coding. Estimates are not seasonally adjusted. Data compiled in cooperation with the U.S. Department of Labor, Bureau of Labor Statistics. Other categories within industry series have not been validated by BLS although they are derived from the same source.

* Due to rounding, sum of individual items may not equal totals. Estimates include all full-time or part-time wage and salary employees who worked or received pay during the week including the 12th of the month. Nonagricultural self-employed, unpaid family workers, and domestics are excluded. Estimates based on March 1983 benchmark utilizing 1972 Standard Industrial Classification Coding. Data compiled in cooperation with the U.S. Department of Labor, Bureau of Labor Statistics.
February 1984

ESTIMATED COLORADO NONAGRICULTURAL WAGE AND SALARY EMPLOYMENT FOR 1981

* Estimates of all full and part-time employees who worked during or received pay for any part of the pay period including the 12th of the month. Excluded are self-employed, unpaid family, domestic workers and members of the Armed Forces. Estimates based on March 1989 benchmark utilizing 1987 Standard Industrial Classification Codes. Data is not seasonally adjusted. Only subsectors for which an adequate estimating sample is available are shown. Due to rounding, sum of major industry sectors may not equal total. Goods producing industries are mining, construction and manufacturing. Estimates made in cooperation with the U.S. Department of Labor, Bureau of Labor Statistics.

Boulder-Longmont Metropolitan Statistical Area (MSA) is Boulder County.

Department of Labor and Employment, Labor Market Information - March 1990

* Estimates of all full and part-time employees who worked during or received pay for any part of the pay period including the 12th of the month. Excluded are self-employed, unpaid family, domestic workers and members of the Armed Forces. Estimates based on December 1986 benchmark utilizing 1972 Standard Industrial Classification Codes. Data is not seasonally adjusted. Only subsectors for which an adequate estimating sample is available are shown. Due to rounding, sum of major industry sectors may not equal total. Estimates made in cooperation with the U.S. Department of Labor, Bureau of Labor Statistics. Metropolitan Statistical Area (MSA) includes Adams, Arapahoe, Denver, Douglas and Jefferson Counties.

* Due to rounding, sum of individual items may not equal totals. Estimates include all full-time or part-time wage and salary employees who worked or received pay during the week including the 12th of the month. Nonagricultural self-employed, unpaid family workers, and domestics are excluded. Estimates based on March 1985 benchmark utilizing 1972 Standard Industrial Classification Coding. Estimates are not seasonally adjusted. Data compiled in cooperation with the U.S. Department of Labor, Bureau of Labor Statistics. Other categories within industry series have not been validated by BLS although they are derived from the same source.

Metropolitan Statistical Area (MSA) includes Adams, Arapahoe, Denver, Douglas, and Jefferson Counties.

* Due to rounding, sum of individual items may not equal totals. Estimates include all full-time or part-time wage and salary employees who worked or received pay during the week including the 12th of the month. Nonagricultural self-employed, unpaid family workers, and domestics are excluded. Estimates based on March 1985 benchmark utilizing 1972 Standard Industrial Classification Coding. Estimates are not seasonally adjusted. Data compiled in cooperation with the U.S. Department of Labor, Bureau of Labor Statistics. Other categories within industry series have not been validated by BLS although they are derived from the same source.

Metropolitan Statistical Area (MSA) includes Adams, Arapahoe, Denver, Douglas, and Jefferson Counties.

* Due to rounding, sum of individual items may not equal totals. Estimates include all full-time or part-time wage and salary employees who worked or received pay during the week including the 12th of the month. Nonagricultural self-employed, unpaid family workers, and domestics are excluded. Estimates based on March 1981 benchmark utilizing 1972 Standard Industrial Classification Coding. Data compiled in cooperation with the U.S. Department of Labor, Bureau of Labor Statistics.

* Prepared by the Colorado Department of Labor and Employment. Averages are based upon data for full and part-time production and related workers, including the nonsupervisory employees and working supervisors who were employed during the pay period including the 12th of the month. These average earnings are computed on a "gross" basis and may reflect changes in premium pay for overtime and late shift work as well as changes in basic hourly and incentive wage rates. Average hourly earnings are not wage rates but are averages of gross earnings of all employees below the administrative level. Produced in cooperation with the Bureau of Labor Statistics.

* Prepared by the Colorado Department of Labor and Employment. Averages are based upon data for full and part-time production and related workers, including the nonsupervisory employees and working supervisors who were employed during the pay period including the 12th of the month. These average earnings are computed on a "gross" basis and may reflect changes in premium pay for overtime and late shift work as well as changes in basic hourly and incentive rates. Average hourly earnings are not wage rates but are averages of gross earnings of all employees below the administrative level. Produced in cooperation with the Bureau of Labor Statistics.

** Metropolitan Statistical Area includes Adams, Arapahoe, Denver, Douglas and Jefferson Counties.

* Labor Market Area includes Adams, Arapahoe, Boulder, Clear Creek, Denver, Douglas, Gilpin, and Jefferson Counties.

** 1982 data prepared in cooperation with the Bureau of Labor Statistics. 1983 data prepared by the Colorado Department of Labor and Employment. Averages are based upon data for full and part-time production and related workers, including the nonsupervisory employees and working supervisors who were employed during the pay period including the 12th of the month. These average earnings are computed on a "gross" basis and may reflect changes in premium pay for overtime and late shift work as well as changes in basic hourly and incentive wage rates. Average hourly earnings are not wage rates but are averages of gross earnings of all employees below the administrative level.

RESIDENCY ADJUSTMENT FACTORS FOR ESTIMATES OF TOTAL EMPLOYMENT BY COUNTY HAVE BEEN UPDATED FOR 1980 CENSUS PATTERNS OF COMMUTING AND MULTIPLE JOBHOLDING. ALSO, THE PRESENTATION OF DATA IN TWO LABOR AREAS HAS CHANGED. THE DENVER METROPOLITAN STATISTICAL AREA (MSA) NOW INCLUDES ADAMS, ARAPAHOE, DENVER, DOUGLAS AND JEFFERSON COUNTIES. THE BOULDER-LONGMONT MSA IS BOULDER COUNTY. THE COLORADO SPRINGS MSA NOW CONTAINS EL PASO COUNTY.

ESTIMATES MADE IN COOPERATION WITH THE U.S. DEPARTMENT OF LABOR, BUREAU OF LABOR STATISTICS AND ADJUSTED TO THE 1985 CURRENT POPULATION SURVEY.
